2018 was remarkably a challenging year for our country due to difficult political and economic settings which, in the financial system, were turned into a modest growth in deposits from the public and a larger increase in credit line, especially consumption.

In this sense, Banco Internacional has remained firm in its purpose of supporting the country's economic development by means of a transparent and cautious management of the resources entrusted by our clients. Along these lines, 80% of our credit line was assigned to the production sector and we maintained the leadership in the Foreign Trade business, both exports and imports.

The constant effort to strengthen our branch network, both in infrastructure and service, as well as providing our clients with new digital channels, has allowed us to gain the trust of 53,000 new clients.

Regarding the financial environment and value generation to our stockholders, the bank stands out again because of its efficiency, profitability, portfolio quality and coverage, showing better indicators in all levels compared to the market average.

The bank was awarded by the Great Place to Work Institute as the best financial institution to work for in the country under the category of those with more than 500 collaborators. This is an evidence of how important the collaborators are to the bank and how important return conviction in productivity is when work environment is outstanding.

The financial strength of this institution, characterized by a high level of mediation and a rigorous cost control, allowed us to maintain our AAA rating (the highest one granted to bank entities in the country), as well as to be considered the Bank of the Year 2018 in Ecuador by the London magazine The Banker, a recognition that makes us feel proud and engages us to keep contributing to the development of the people and companies that trust us.

The aforementioned has been possible thanks to the support of shareholders, Board of Directors, and the effort and commitment made by the 1,300 collaborators that are part of the bank, to whom I am sincerely grateful.

THE ECUADORIAN ECONOMY IN 2018

REAL SECTOR

Ecuador's GDP increased at both real (1.1%) and nominal (4.95%) terms to achieve \$109,454 billion, mostly influenced by the increase in household spending (3.1%).

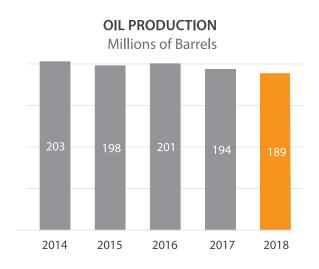

GROSS DOMESTIC PRODUCT

Annual variation rate

Source: Central Bank of Ecuador

The level of oil production was 189 million barrels, decreased slightly by 2.7% compared to 2017. The average price per barrel was 32% greater than 2017, with a volatility influenced by the uneven signals concerning the announcement of sanctions from the United States against Iran, the oil shale production increase in the United States, among others.

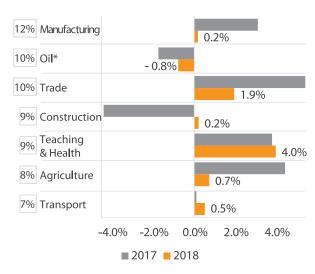

Source: Central Bank of Ecuador

As for the non – oil sector, manufacturing was the most important industry, with 12% of GDP, followed by trade and construction with 10% and 9%, respectively. During 2018 the economy witnessed a lower growth among all the sectors, compared to 2017.

GDP BY INDUSTRY

Annual variation rate

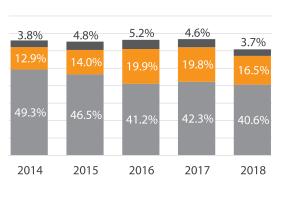

Source: Central Bank of Ecuador

Suitable employment was reduced by 1.7 percentage points, a reflection of lower capacity in the market to recruit in an economy that experienced deceleration.

LABOR MARKET

Data to December as % of PEA

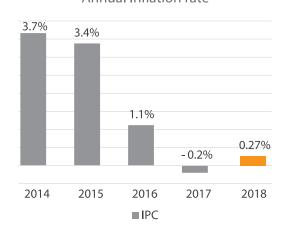

■ Suitable employment ■ Underemployment ■ Unemployment

Sources: Ecuador Statistics and Census Institute

^{*} Includes Mines and Oil Refining

Although the annual inflation rate was 0.27%, its negative indicator was maintained until August, month in which the first review regarding gas, fuel subsidy was evaluated. The effect of this new measure could be observed with an increase in Goods and Services, and Transport by 0.11% and 0.10%, respectively, among the most relevant.

ANNUAL INFLATION Annual Inflation rate

EXTERNAL SECTOR

In general, the world economy increased during 2018, which benefited the propensity to consume Ecuadorian products and services at a higher relative price or in larger quantities. Export sectors, such as oil, shrimp and banana, mainly, showed growth; thus, promoting a total export increase by 13%.

Reviewing the composition of the export offering corresponded to: Oil 41%, primary products (non – oil) 42%, and industrialized goods 17%.

EXPORTSMillions of USD and Composition

Source: Central Bank of Ecuador

Oil export reached 8,802 billion. The USD 1,888 billion increase (27%) is due to the barrel average price growth, rather than a production increase.

PRICE OF OIL EXPORTS

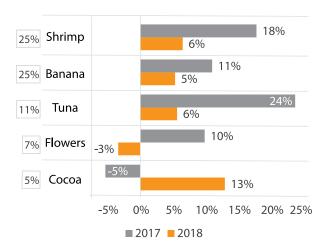

USD/b

Non – oil exports reached USD 12,804 billion; USD 596 million (5%) greater than 2017. Food basket remains stable within the traditional offer; whereas shrimp - for the second consecutive year – is the major export product after 40 years of banana trade domain.

NON - OIL EXPORTS

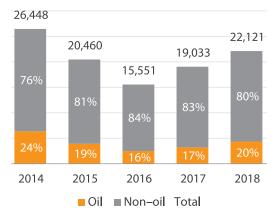

Annual Variation Rate

Source: Central Bank of Ecuador

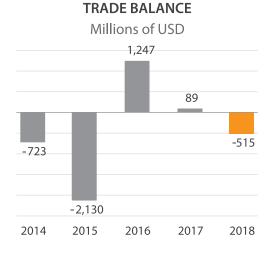

The strengthening of the US dollar, the gradual elimination of safeguards and the oil price increase, among other factors, generated a 16% increase in imports reaching USD 22,121 billion. Out of the imports, oil companies totaled USD 4,358 billion (20% of the total), with an annual increase of 36%. Whereas, non - oil imports reached USD 17,763 billion (80% of the total) incrementing by 12% compared to 2017.

IMPORTSMillions of USD and Composition

Source: Central Bank of Ecuador

The balance of trade re incorporates a deficit of USD 515 million after two years of surplus.

Source: Central Bank of Ecuador

Remittance reached USD 3,03 billion (3% of GDP), with a 7% increase compared to 2017. In turn, Direct Foreign Investment was USD 819 million, 32% compared to 2017; despite the increase, there is a modest participation within the GDP (0.7%).

FISCAL SECTOR

In 2018 the Central Government revenue reached USD 20,28 billion (19% of GDP), which meant a growth of 11% compared to 2017. From the figures given above, 74% came

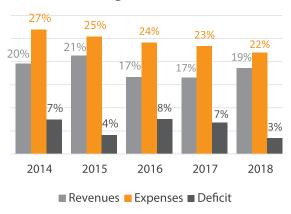

from tax revenue (USD 15 billion) which increased by 8% compared to 2017, influenced mainly by 25% growth VAT collection and USD 1,268 billion in remittance tax. Additionally, non-permanent revenues for USD 1,979 billion were registered due to crude oil pre-sell.

Central Government expenditure reached USD 24,027 billion (22% of GDP), 1% lower compared to 2017. The current spending, accounting for 71% of the total, increased by 10% compared to 2017, while capital spending decreased by some 21%, reaching USD 6,859 billion.

As a result of the figures stated above, fiscal deficit reached USD 3,747 billion (3% of GDP), that added to other items such as debt repayment, payment for cash advances for oil sales and other liabilities, required the Government to obtain financing for about USD 10 billion.

CENTRAL GOVERNMENT OPERATIONS

Percentage in terms of GDP

Source: Tax Policy Observatory

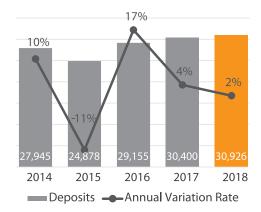

Under these conditions, the public debt increased by 6% during the year, reaching up to USD 49,429 billion (45% of GDP), 72% of which was external debt.

MONETARY AND FINANCIAL SECTOR

Liquidity in the economy was affected by the tax burden and public debt decrease. Bank deposits as of December 2018 reached USD 30,926 million (28% of GDP), with a 2% annual growth.

BANK DEPOSITS

Millions of USD and Annual variation rate

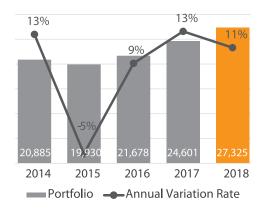

Source: Superintendence of Banks

The credit portfolio grew at a higher dynamic compared to deposits with an 11% annual growth rate setting to USD 27,325 million (25% of GDP). At a segment level, credit portfolio had a greater dynamic with 16% annual growth, followed by Trade portfolio with 9.5%, Mortgage loans 5%, Small business credit 9.2% and Educational -7.4%.

CREDIT PORTFOLIO

Millions of USD and Annual variation rate

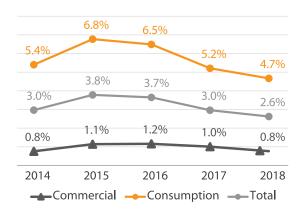

Source: Superintendence of Bank

Despite the risks in macroeconomic environment, the non - performing portfolio showed a rate of 2.6% lower by 0.3 percentage points. The NPL ratio of the trade portfolio was 0.8% as of end year, while the consumption default rate reached 4.7%.

DELINQUENCY RATE BY SEGMENT

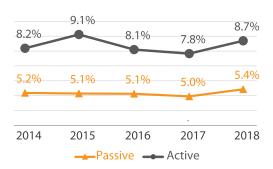

Data to December

PORTFOLIO GROWTH

Source: Superintendence of Bank

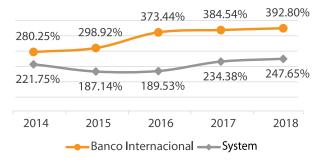

At the close of 2018 fiscal year, the quality portfolio of Banco Internacional reflects the default rate at 1.03%, 10 basis points lower than that of the previous year, and below the average indicator of the Financial System (2.62%). The NPL coverage at the close of the year was 392.80%, far superior to the System's average (247.65%).

DELINQUENCY

Source: Superintendence of Bank

COVERAGE

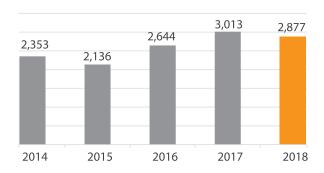

Source: Superintendence of Bank

The leadership position of Banco Internacional with regard to Ecuadorian Foreign Trade is reflected in the contingent operations balance (securities, guarantees, letters of credit), reaching USD 729 million at the close of the year.

Public liabilities account for USD 89.94% of the Bank's total sources of funding with USD 2,877 billion balance at the close of 2018 and 4.5% reduction compared to the previous year. Out of this total, the deposits at sight reached USD 1,789 billion and fixed - term deposits USD 1,003 billion. This is mainly explained due to a lower concentration of deposits. The rate of the 100 greatest depositors over the total of public liabilities decreased by 4 percentage points.

LIABILITIES TO THE PUBLIC

In Millions of USD

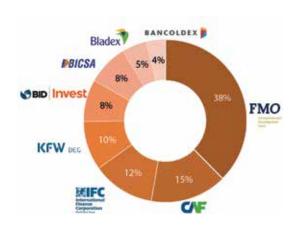

Source: Superintendence of Bank

During 2018 loan facilities with multilateral organization and foreign financial institutions were managed in order to rely on more stable and long - range sources of funding. Liabilities balance at the end of the year reached USD 204 million.

DEBT FROM FINANCIAL INSTITUTIONS

In Millions of USD

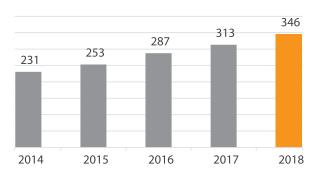

Source: Banco Internacional

With regard to the entity's solvency, paid – in capital registered an increase of USD 24.7 million, reaching USD 237.6 million, due to the capitalization of the results and reserves from the previous year. The Bank's patrimony increased by 10.36% reaching a total of USD 345.58 million, including the profits for the period.

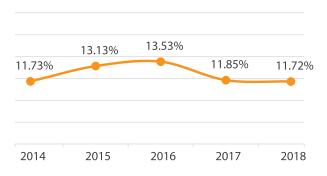

The technical equity ratio, which relates the bank's constituted technical equity with risk - weighted risk and contingents, reached 11.72% as of December 2018, similar to what was observed in 2017. This indicator reached 2.72% percentage points above the regulatory minimum.

RESULTS STATEMENT

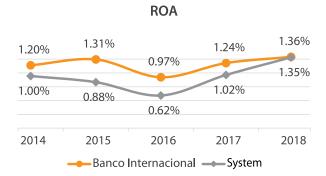

The Gross Financial Margin, which comprises net interests, net commissions, service revenue, and the outcome of financial operations, increased by 6.9% reaching USD 201.3 million as of December 31. The operating cost reached USD 109.8 million (6.4% greater than previous year), and USD 17.68 million were allocated to provisions.

The increase of the brokerage margin and the income for transactional services, in addition to a conservative cost management regarding income and expenses, allowed Banco Internacional to optimize its performance indicator by 1.41 points reaching 59.83%, significantly greater than the presented by the financial system in the same year.

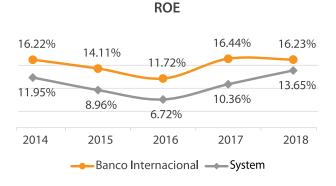

EFFICIENCY 92.60% 87.45% 85.01% 84.32% 76.90% 70.10% 68.64% 67.40% 61.24% 59.83% 2014 2015 2016 2017 2018 Banco Internacional ——System

BUSINESS MANAGEMENT

The need to accompany Ecuador's productive sector, without overlooking the management of inherent risks, demanded new and greater efforts in the management from the financial system. In this sense, Banco Internacional has achieved both qualitative and quantitative results presented in this report by accomplishing its organizational values: financial strength, exemplariness, closeness and assertive decision-making; and a technical and prudent risk management, as a differentiating element.

Our "Plan Estratégico 20|20 (20/20 Strategic Planning)" continues its vision of ongoing improvement to become the best bank of Ecuador; with a solid and profitable growth, supported in the pillars of high standards of service, outstanding levels of efficiency and productivity of our processes and, as mentioned previously, always being prudent in the integral risk management. All these under a professional and committed human talent management.

We continue to improve our network to offer greater comfort to our customers: three branches in Quito were refurbished as well as Quevedo, Babahoyo and Parque California in Guayaquil. We now have available 75 offices, 13 extension tellers distributed in 18 provinces and 32 cities across the country, in addition to 396 ATMs, 20 of which are the so-called "Depósito Rápido (Quick Deposit)" allowing users make account deposits and credit card payments without needing to stand in line at the tellers. At the close of 2018, branches that have these service points derived 25% of total transactions to said tellers.

Besides our branches' appearance improvement, processes were reviewed and simplified allowing waiting times and customer service be controlled. In addition, we permanently carry out on-site satisfaction surveys and protocol compliance for ongoing improvement for each office, reaching 84.9% Customer Satisfaction Index.

Followed by a multi-channel strategy, at the beginning of 2018 we launched the new "Banca Móvil (Mobile Banking)"; electronic channel that allows our customers to have the bank in their hands from any mobile device to check their accounts, transfer money and pay for services. It is important to highlight that in the future the technological platform used for this APP will allow all available banking services in Internet to be used in any device, offering alternatives to serve customers under a multi-channel concept.

We also updated the technological tool for Foreign Trade, aiming to ease internal processes and enhance customer service through Internet regarding letters of credit. We closed the year with 14.12% market share in issuance of Import Letters of Credit, securities and warranties.

We are convinced that during 2018 these actions contributed to 53,000 new customers, where 96% of them are natural persons and 4% are legal entities.

The renewal of the Management Information System continued, enabling the administration have eight new dash-boards allowing for the monitoring of day-to -day performance at the bank.

RISK AND COMPLIANCE MANAGEMENT

Banco Internacional's Risk Management is mainly based on the principles of discipline, prudence and independence, aligned to achieving strategic business objectives ensuring its liquidity in the short, medium and long term. In 2018, Banco Internacional focused its efforts to strengthen both financial and non-financial risk prudent management. With regard to the management, risk appetite framework was implemented to define the standards, Government schemes and key application processes, as well as quantitative indicators and qualitative statements, which, by being associated to relevant risks, specify its risk appetite at the highest level.

Such framework has allowed the bank to strengthen liquidity and market risk management, with scenarios that operate the existing contingency plans.

Additionally, the credit risk control environment was reinforced through the implementation of tools oriented to enhance the service for small and medium - size companies (Pymes), by developing statistical methods for trade credits and credit cards follow-up.

Conversely, an Operational Risk Management Committee was implemented as well as SARO (Operative Risk Management System); thus, boosting communication channel, monitoring, rating and timely management of events.

Operative risk management also includes the carrying out of an array of policies, processes and controls in order to prevent our institution from being used as a tool to commit crime, such as asset laundering, among other illegal activities. The Compliance Unit, in the interest of continuous improvement, has combined efforts to reinforce the Monitoring project. This strategy was applied in connection with the purpose of setting up the monitoring rules of the tool as well as implementing control that allows us to continually guarantee the correct reception of information from each transactional channel, and to timely identify events.

Aligned with our internal control systems, based on three defense lines, we are permanently committed to training all the collaborators on the importance to prevent illegal activities. This outlook is supported by the Board of Directors as well as the management team at all levels in the institution.

As a result, the Risk Rating report that was prepared in June 2018 by Bank Watch Ratings and Class International Rating has awarded Banco Internacional with the local rating AAA-and AAA, the highest one obtained by an Ecuadorian bank.

HUMAN TALENT

We work with our institutional values that, together with specific strategic guidelines, allow us to reach our goals, by working from individual to collective.

Our collaborators' constant development strengthens our organizational culture. This is the reason why we train 417 leaders on programs focused on management skills and personal leadership, providing them with tools that make it possible to develop management skills, high performance and equipment management.

So as to systematize the cycle of Human Resources Management; and this way, to accompany our collaborators' progress, the platform JUNTOS, based on the SAP-Success Factor technology, was set up. This application allows us to thoroughly manage all the Human Resources processes, including performance assessment.

In 2018 the program called Calidad de Vida (Life Quality) was launched and by means of which personal and professional growth activities were encouraged with the commitment to protecting our collaborators' physical, mental and relational aspect; hence, life-work balance can be improved.

These measures, in addition to the constant interest on the part of the management team in maintaining an adequate work environment, resulted for second year in a row in a recognition awarded to Banco Internacional by the Great Place to Work Institute as one of the best companies to work in Ecuador, obtaining a second place among the companies with more than 500 collaborators, which allows us to be the best financial institution in this ranking.

CORPORATE SOCIAL RESPONSABILITY AND FINAN-CIAL EDUCATION

Not only does Banco Internacional concern about value generation in terms of its business goals, but also about carrying out responsible management. Consequently, we work according to the Sustainable Development Goals proposed by the United Nations, especially the eight one that states as follows: "Promote sustained, inclusive and sustainable economic growth, full and productive employment, and decent work for all".

In this context, since 2013 the Financial Education Program that is aimed at clients, suppliers and community in general is performed, reaching up to 2,200 people in 2018 by means of costless workshops.

Likewise, the Project "Learning to Start up", which began in 2015 through an alliance with Plan Internacional as well as the contribution on the part of the volunteers from the institution, has successfully finished in 2018, leaving as legacy a Community Cultural Center that is self-sustainingly managed by women and more than 1,000 young people trained in Financial Education.

Additionally, an alliance with LAB XXI, a development lab for education and training in benefit of young people with low income under the YPD (Young Potential Development) methodology, was signed. This alliance counted on the participation of 70 volunteers from Quito and Guayaquil that have actively collaborated in the transfer of this methodology to 6 high schools, 12 teachers and 3,120 students; as well as a Technical Center with 54 poorly educated young people that were benefitted from this program.

ACKNOWLEDGEMENT

To conclude, all that is left for me to do is to thank our Stockholders for the trust they have granted to the Bank's Management one more year. I am convinced that they have a well-prepared institution to respond to the important challenges that future may bring.

The continuous support of the Board of Directors, the commitment and professionalism of the Executive Committee and, clearly, the effort and dedication on the part of the more than 1,300 collaborators have been and will be the successful key of this great institution. I would like to extend my gratitude to everyone.

Francisco Naranjo Martínez
